Summary

Java Full Stack Developer with expertise in **frontend technologies** (HTML, CSS, JavaScript, React.js) and **backend development** using **Java** (Spring Boot). Proficient in **MongoDB**, **MySQL** for database management. Strong problem-solving skills and hands-on experience in building scalable applications, demonstrated through impactful internships and projects. Ready to contribute to dynamic development teams and drive innovation.

Education

Lovely Professional University, MCA (Pursuing)	Aug 2025 – Present
ExcelR, Java Full Stack Development (Diploma)	Sept 2023 – May 2024
NB Science College, B.Sc in Computer Science	Dec 2020 – May 2023
• CGPA : 8.23	
Kendriya Vidyalaya, 12th MPC	May 2019
• Percentage : 59.28	

Experience

Software Developer (Internship) , Techmatic Systems India Pvt Ltd	March 2025 – May 2025
<ul style="list-style-type: none">Developed a Restaurant Website with separate interfaces for customers and admin panel using React.js, ensuring responsive and user-friendly design.Worked on bug fixes and feature enhancements in existing React.js projects to improve stability and performance.Gained hands-on exposure to NestJS by building simple REST APIs (minor contribution).Collaborated in an agile team environment, enhancing skills in frontend development and cross-functional teamwork.	
Junior Developer , LeafCraft, Hyderabad	Sept 2024 – Dec 2024
<ul style="list-style-type: none">Built responsive web applications with React Js, Tailwind CSS and ShadCn UI ensuring seamless design across devices. GraphQL APIs and Redux for efficient data handling and scalable state management.Developed robust TypeScript code with enhanced type safety and added dynamic 3D features using Three.js.	
Junior Developer , LeafCraft, Hyderabad	Sept 2024 – Dec 2024
<ul style="list-style-type: none">Designed and developed user and admin interfaces for an Employee Management System and an E-commerce platform (Sneakers Store) using React Js, with secure authentication and responsive design.Implemented routing, navigation, and state management using Redux for cart and wishlist functionalities, ensuring a seamless user experience.Collaborated with backend developers to integrate API's and synchronize the frontend with a Spring Boot backend, following the MVC architecture.	

Skills

HTML, CSS, Tailwind, JavaScript, Typescript, ReactJs, ReactNative, Java, Spring Boot, MySQL, Git

Projects

Restaurant Management Web Application

- Developed a **Restaurant Management Web Application** using **React.js** with **TypeScript**, **Tailwind CSS**, **ShadCN UI**, and **Context API**, with data handling through **localStorage**.

- **User Side:** View restaurant details, explore food categories, choose portion sizes (small/medium/large), place orders with payment options, and receive invoices. Supports **dark/light mode**.
- **Admin Side:** Dashboard to monitor orders, revenue, and menu items. Add menu items with automatic image compression (50kb) and manage orders with search and filtering functionality.

ECommerce Sneaker Head

- Developed an E-commerce web application using **ReactJS** for the frontend and **Java** with for **MySQL** backend.
- Implemented features like Add to Cart, Wishlist, and Admin Panel for managing products and orders.
- Designed a secure and user-friendly interface to enhance customer experience and streamline admin operations.

3D Portfolio

- Developed a 3D animated portfolio website using **React Js**, **Three.js**, and **GSAP**, enabling interactive 3D object manipulation for an engaging user experience.
- Designed and styled the application with **Tailwind CSS**, ensuring responsiveness and modern aesthetics across devices.
- Optimized 3D rendering and animations for smooth performance, enhancing visual appeal and user engagement.
